System Administrator Internship

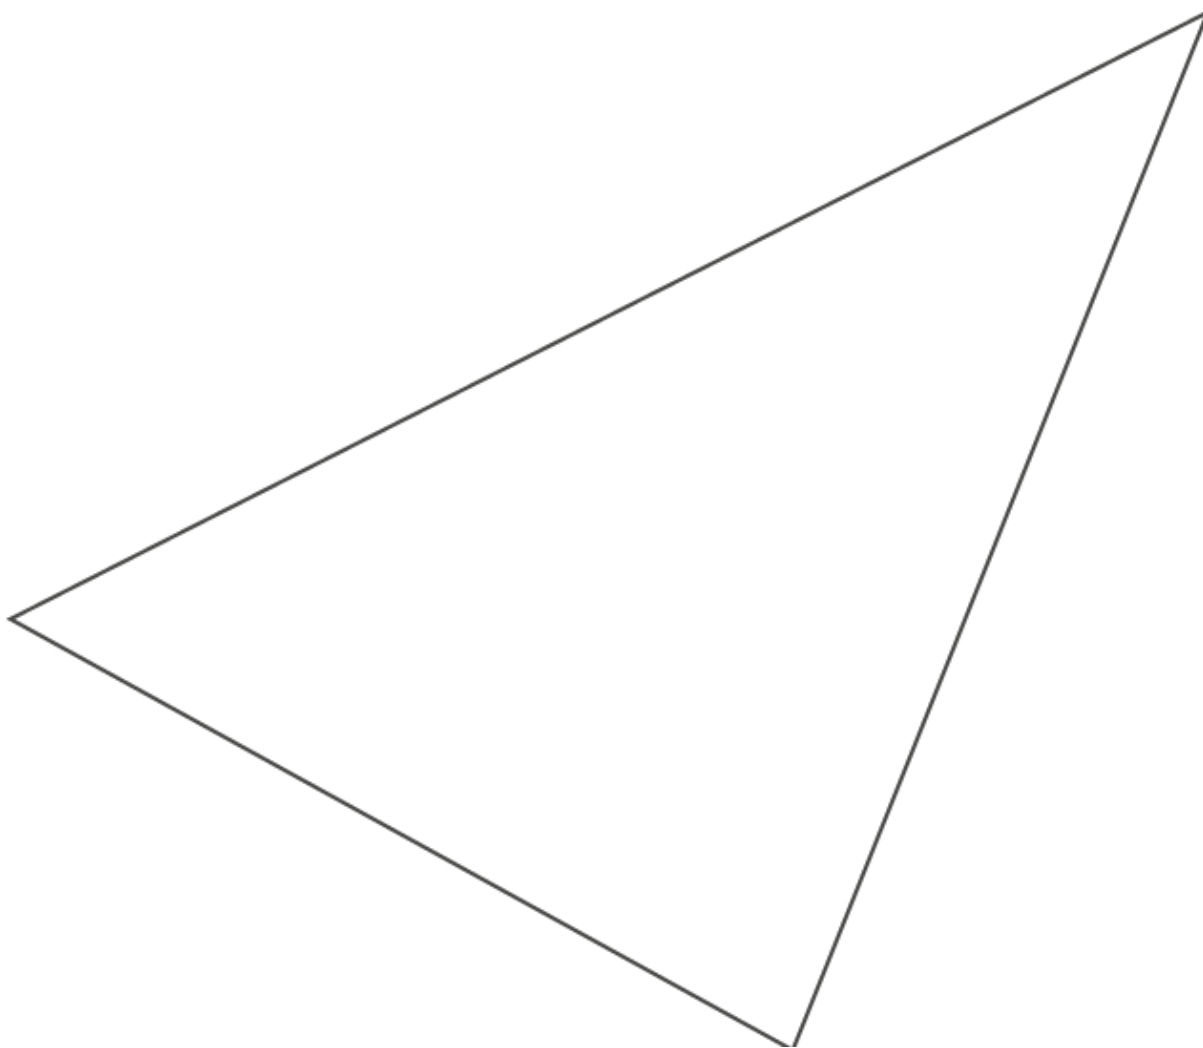

Job Description

Working with all the latest technologies, Amaris IT department is a dynamic and driving force for the whole Group. As an enthusiastic master student or involved in a Engineering School program you will have the opportunity to become part of our dynamic IT team and support the development of our own innovative systems and applications. As a passionate intern you will take ownership of the following projects:

- Planning and migrating Active Directory from Server 2008 to Server 2012
- Creating and setting up a new Active Directory security strategy
- Maintaining and deploying virtual machines on our private cloud
- Setting up a new backup strategy for all virtual machines in an external datacenter
- Configuring and monitoring backup with Veam Backup
